

Josep Fernández Ortega

Developer Frontend | Angular | Architecture Frontend | Modernization Legacy

Puntarenas, Costa Rica · fernandezjos98@gmail.com · 844-60212 · linkedin.com/in/josep-fernandez

PERFIL PROFESIONAL

Frontend Developer with 2+ years of experience building enterprise applications. Focused on **Angular**, modernizing legacy systems, and defining projects from the ground up. Experienced in **technical leadership**, **quality standards**, and **frontend architecture**. I also complement my profile with ongoing **Full-Stack projects** using **Next.js** and **NestJS**.

PROFESSIONAL EXPERIENCE

PeopleApps — Frontend Developer | Feb 2024 – Present

- Develop and maintain enterprise applications using Angular, Razor, and JavaScript.
- Contribute to core business systems by implementing functional enhancements and corrective improvements in critical modules.
- Define frontend architecture, design patterns, folder structures, and technical guidelines for new projects.
- Served as technical lead for a development team, ensuring code quality, providing technical support, and promoting best practices.
- Participate in the migration of legacy applications (Razor + JavaScript) to modern Angular using Signals, OnPush Change Detection, Lazy Loading, and zoneless architecture.

Tech Stack: Angular, Razor, JavaScript, .NET MAUI, Signals, OnPush, Lazy Loading, Zoneless.

Cretec Solution S.A. — Full Stack Developer | Aug 2023 – Jan 2024

- Developed a platform for managing medical consultations and clinical examinations.
- Implemented business modules and contributed to technical design and system architecture decisions.
- Designed, maintained, and optimized relational databases using MySQL.
- Managed dependencies with Composer and worked with database migrations and Eloquent ORM.

Tech Stack: Laravel, Livewire, JavaScript, MySQL, Composer, Eloquent ORM.

PERSONAL PROJECT (ongoing)

Hotel Management Platform | Full-Stack Developer

- Gathering requirements, designing responsive user interfaces, and implementing features using Next.js and NestJS.
- Implementing authentication and authorization with JWT and guards, while modeling data with Prisma ORM.
- Managing data persistence with MySQL and PostgreSQL.
- Designing and developing the platform following scalable and maintainable architecture principles.

EDUCATION

- Bachelor's degree in business informatics — University of Costa Rica (Golfito Campus)
- Technical Diploma in IT Support — CTP Umberto Melloni Campanini
- High School Diploma — CTP Umberto Melloni Campanini
